CASOA™ Demographic Profile

NRC is a charter member of the AAPOR Transparency Initiative, providing clear disclosure of our sound and ethical survey research practices.

Background

About the Community Assessment Survey for Older Adults™

CICOA Aging & In-Home Solutions (CICOA) contracted with National Research Center, Inc. (NRC) to conduct an assessment of the strengths and needs of its older residents. The Community Assessment Survey for Older Adults (CASOA™) is a statistically valid survey of older adults used by staff, elected officials and other stakeholders to plan for older adult services, programs and facilities. The ultimate goal of the assessment is to create an empowered community that supports a vibrant older adult population in Central Indiana.

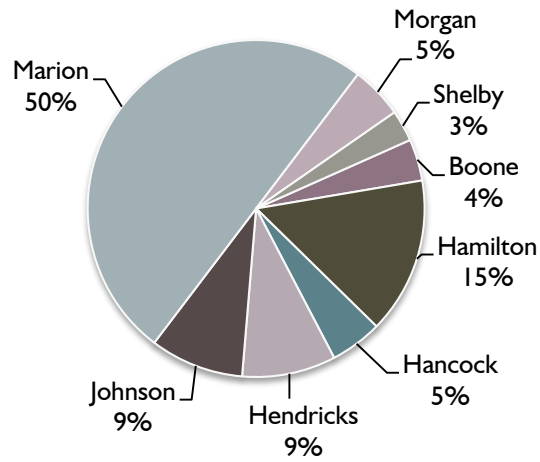

Communities conducting CASOA™ can choose from a number of optional services to customize the reporting of survey results. One of the add-on options that CICOA chose was to profile the older residents in its service area by reviewing available current demographic information. This report summarizes the demographic information available for the counties in CICOA's service area (Boone, Hamilton, Hancock, Hendricks, Johnson, Marion, Morgan and Shelby counties). CICOA's Demographic Profile report is part of a larger project for the Area Agency on Aging (AAA) and additional reports are available under separate cover.

The demographic profile of Central Indiana reviewed age and gender cohorts, the race and ethnic makeup of older residents, as well as data related to income and poverty. A summary of the sociodemographic profile of CICOA Aging & In-Home Solutions' older adults follows. Detailed population tables are provided in *Appendix: Detailed Demographic Tables*.

Older Adults in Central Indiana

- In 2015 there were almost 300,000 older adults (persons 60 and over) living in the eight counties served by CICOA Aging & In-Home Solutions. These older adults accounted for 17% of Central Indiana's total population.
- Almost 40% of the older adults in Central Indiana were between the ages of 65 and 74; Morgan and Hancock Counties had slightly larger proportions of these older adults when compared to the other counties in the AAA.
- Because women tend to outlive men, older age groups have higher proportions of women. In the 60 to 64 age group, women constituted a small majority of 53%; this majority grew to 62% for those age 75 and over.
- The majority of older adults in Central Indiana were white (85%) or not Hispanic (98%). Marion County houses the largest proportion of older residents who were not white (26%) and who were Hispanic (3%).
- Less than half of the older residents in Central Indiana lived alone; Hancock and Morgan Counties had fewer older residents living alone when compared to the other counties in the area; Marion County had the most older adults living alone.
- Less than one-third of the older residents in Central Indiana lived below 200% poverty level; almost 1 in 10 older residents were below 100% poverty.
- The median income of older adults in CICOA Aging & In-Home Solutions' service area was about \$39,866, compared to \$36,339 for the state of Indiana and \$38,726 for the entire nation.
